Office Hours:
MTWRF 11:30am - 12:30pm

Text(s):
SparkCharts: Calculus II
TI-83 Calculator (or equivalent)
Calculus: Concepts & Contexts
by James Stewart, 3rd Edition

General Info:
In this course we will cover integrals, sequences, and their applications. (Chapters 5, 6, and 8 in Stewart’s textbook.) There will be homework sets to be turned in in-class as well as quizzes. There will be 3 in-class tests (7/17, 7/30, and 8/7) and a final exam (August 10 at 8am); there will be a review for each test the class before that test. I expect every student to attend each class and will take attendance.

3 tests (15% each) . . . . . . . . . . . . 45%
homework . . . . . . . . . . . . . . . . . . . . 15%
quizzes . . . . . . . . . . . . . . . . . . . . . . 15%
final . . . . . . . . . . . . . . . . . . . . . . . . . . . . 25%

Make-Up Work (Quizzes, Homework, & Tests):
You must come to me ahead of time to arrange for make-up tests.
I won’t guarantee to grade late homework; however, any homework turned in will get a better grade than no homework turned in. Late homework will be accepted until its solutions key is posted on the class website and will have 10% taken off the original grade.

Extra Credit Work:
There will be opportunities for extra credit both on the class tests and on the homework.

Questions about Homework or Other Problems/Examples:
Bring any questions to class. If we do not have time to go over all the questions at the beginning of class, come by my office or email me.
